### About This Game

CuVRball is an online multiplayer action game that is easy to learn and fun to play.

Key features include:

- Artificial locomotion that is specifically designed to minimize motion sickness with smooth acceleration, collision avoidance, and easy controls.
- Easy and fun action right off the bat, no need to memorize builds, maps, or weapons. Just jump in and launch explosives at people.
- Spectator mode available so you can observe and enjoy.
- Team based game play where cooperation, tactics, and skill allow you to dazzle your opponents and amaze spectators.
- Explosions, black holes, and more!
- Free trial lets you see if you like the game.

CuVRball is based on a few simple rules. But it offers a high skill cap to enable many hours of enjoyment. The core game may be simple, but the skill it can be executed with separates the best players. However, even if you are not the highest skilled player, you can still contribute to the team and have a fun time. Just get in there, blow stuff up, and make some friends.

I bought this game on a gamble hoping that it would be just a fun sports ball get away. I can't confirm the game is anything close to that. That is because there is so much more than I was anticipating.

- This game give me the same thrill Rocket League does
- I WANT MORE CHALLENGERS
- Sniped the ball from goal (still proud)
- I got mopped up by the developer (super humble nice guy)
- SLAM DUNKED THE DEV (once)
- With my new found skills mopped up some poor guy wanting a sports ball get away
- Scared my SO in the room due to flexing and beating my chest
- Please buy this game and meet me in the arena
- DON'T BE SCARED OF MY HOVERCRAFT GRENADE LAUNCHING PROWESS
