## Madness

This game won't hold your hand. Sometimes a shrine will curse your equipment, some mark combinations prove less effective than their separate components, sometimes you get trapped in a room full of enemies or a unidentified magic scroll halves your remaining health. There are secret paths with strange requeriments and you have to choose your perks wisely. There's always a way out, but sometimes it won't be evident. Enjoy the madness.

demented pixie

I really like the plot's idea, but the gameplay itself is way too basic and crude and enervating.
